

SYSTEMS

5 LEVELS TO GAUGE YOUR ORGANIZATION'S READINESS TO RESPOND

Envisage Technologies' Readiness Model helps public safety organizations gauge their preparedness for whatever may be thrown their way. The full model serves to evaluate the current ability to respond quickly and effectively in crisis situations—as well as guide continuous improvement.

Systems are just one critical area encompassed by the model. Reaching mission outcomes requires useful software, technology, integrations, and tools to ensure that your organization runs efficiently.

5 LEVELS TO GAUGE YOUR ORGANIZATION'S READINESS TO RESPOND

05. FULLY INTEGRATED SYSTEMS

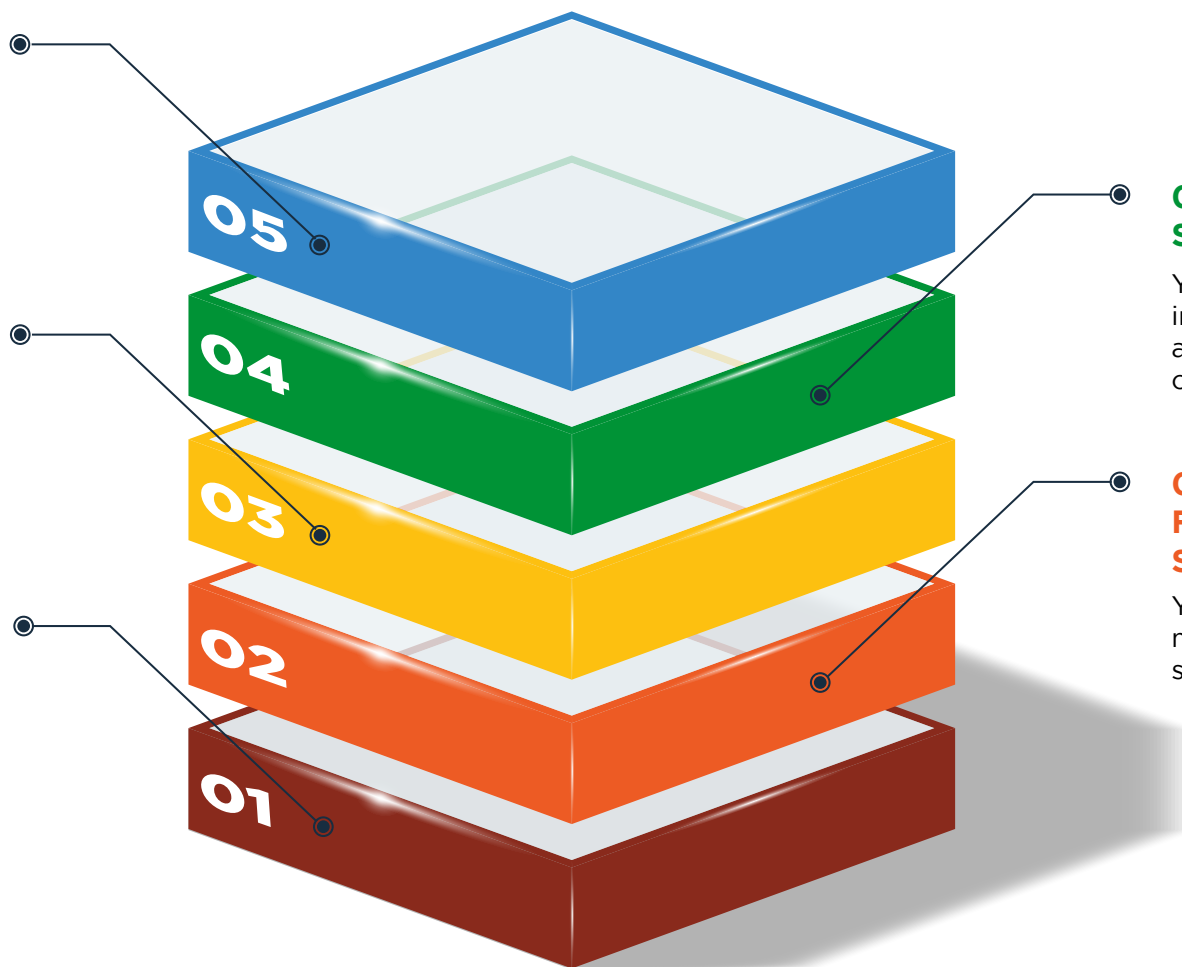

Your systems are fully integrated and optimized for continuous innovation.

03. AUTOMATED SYSTEMS

You have software that automates most day-to-day operational tasks.

01. PAPER-BASED SYSTEMS

You work mainly with paper, and your information is disconnected.

04. CENTRALIZED SYSTEMS

Your organization's information is digitized, automated, and centralized.

02. LEGACY OR FRAGMENTED SYSTEMS

Your data is stored in multiple systems, and your systems are dated.
